has successfully attended the
**Day 5 – Learning Environments & EdTech of the
Educast International Online Conference 2026**
held on 10 February 2026

Day 5 examined the evolving design of learning environments in an increasingly digital world. Sessions explored smart classrooms and immersive technologies, hybrid and blended learning models, accessibility and inclusive design, effective evaluation and implementation of educational technology, and the role of student voice in digital spaces. Participants engaged with emerging tools transforming teaching and learning, while critically considering how technology can enhance—not replace—human-centered education.
